

Marker 2

Cat. No: M1091 (50 μ g)/M1092 (5 \times 50 μ g)

Concentration: 75ng/ μ l

Description

Marker 2 is ideal for determining the size of double-stranded DNA from 100 to 1,200 base pairs. The ladder consists of 6 linear double-stranded fragments. The **700bp** fragment is present at increased intensity to allow easy identification. All fragments are precisely quantified and mixed during the production. For 5 μ l loading, all fragments except 700bp are 50ng. The 700bp fragment is 125ng. This ladder is pre-mixed with loading dye and is ready to use.
