

Random Hexamer Primer, 6-mer

#R2031, 20 μ l

Concentration: 50 μ M

Store at -20°C

For research use only

In total 1 vial.

Description

This primer is a mixture of single-stranded random hexanucleotides with 5'- and 3'-hydroxyl ends. The primer is supplied as an aqueous solution and can be used for first strand cDNA synthesis.

Applications

First strand cDNA synthesis.

Quality control

Each lot of random hexamer primer is functionally tested in a first strand cDNA synthesis reaction using 1.1 kb RNA with 3'-poly(A) tail.

PRODUCT USE LIMITATION.

This product is developed, designed and sold exclusively for research purposes and in vitro use only. The product was not tested for use in diagnostics or for drug development, nor is it suitable for administration to humans or animals.
